Sequence Restriction

1. Claims 1-8 are drawn to mammalian IAP nucleic acid sequences of six individual, independent, and distinct nucleotide sequences in alternative form. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121, due to the differences in sequence composition. Absent evidence to the contrary, each such sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq. Accordingly, in most cases, only one (1) independent and distinct nucleotide sequence will be examined in a single application without restriction. The search of no more than one sequence may include the complements of the selected sequences and, where appropriate, may include subsequences within the selected sequences.

2. Commissioner has partially waived the requirements of 37 C.F.R. 1.141 and will permit a reasonable number of such nucleotide sequences to be claimed in a single application. Under this policy, up to 10 of independent and distinct nucleotide sequences will be examined in a single application (see MPEP § 803.04 and § 2434). However, due to the limitations of the search facilities of the USPTO, a search of more than one (1) of the nucleotide sequences recited in claims 1-8 presents an undue burden on the Patent and Trademark Office due to the complex nature of the search and the corresponding examination of more than one (1) of the claimed mammalian IAP sequences. In view of the foregoing, one (1) antisense sequence is considered to be a reasonable number of sequences for examination.

Art Unit: 1635

3. Accordingly, applicants are required to elect one (1) mammalian IAP nucleic acid sequence from claims 1-8 for search and examination purposes.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
